# Labor

### Standard

[A] Internal adjusting (CAL): Quick setting of the balance's accuracy with internal adjusting weight (motor-driven).

Adjusting program (CAL): For quick setting of the balance's accuracy. External adjusting weight required.

Piece counting: Reference quantities selectable. Display can be switched from piece to weight.

Data interface: The type of interface is shown by the pictogram. For a definition, see page 88.

GLP/ISO record keeping of weighing data with date, time and ident.-no. Only with printers from KERN, see page 88.

REZ Net-total weighing: weight of tare cup and weight of components memorized in two separate stores.

Percentage determination: Displays the deviation from the reference weight (100%) in % instead of grams.

Weighing units: can be switched to e.g. non-metric units at the touch of a key. See balance model.

programmed individually, e.g. dosing / sorting. Suspended weighing: load support with hook on the

underside of the balance.

Upper and lower limiting can be

Mains adapter: 230 V/50Hz in standard version for Germany. On request GB, AUS or USA version.

## **Option** (additional price)

Rechargeable battery pack: rechargeable set.

Factory verification, location of use with post code required. Verification only possible at location of use. \*Verification class . 26 Overall dimensions WxDxH 220x333x93 mm. Net weight approx. 5.8 kg.

Permitted environmental temperature +10 ... +30 °C PCS piece counting with reference quantities of 5,10,30,100 pieces. UNITS Further weighing units: see the internet.

#### KERN – Your DKD-Calibration Partner

issues DKD calibration certificates for balances and test weights in its own accredited laboratories. It is internationally valid. KERN is a manufacturer of test weights in the international classes of accuracy E1, E2, F1, F2, M1, M2, M3, from 1 mg up to 2000 kg DKD = German Calibration Service
